

FOR IMMEDIATE RELEASE

## Marsh Electronics, Inc. Unveils Cutting-Edge Warehouse Technology in Latest Video

January 31<sup>st</sup> – Marsh Electronics, Inc., is thrilled to announce the release of our latest video showcasing the groundbreaking Vertical Lift Module technology, our MKE1, implemented in our warehouse.

Designed to revolutionize storage and retrieval processes, the MKE1 system maximizes efficiency, minimizes footprint, and enhances overall operational productivity. The video provides an in-depth look at how this advanced technology seamlessly integrates into our warehouse, streamlining inventory management and optimizing space utilization.

Key Features Highlighted in the Video:

1. **Space Optimization:** The VLM system utilizes vertical space, allowing for increased storage capacity without expanding the warehouse footprint.
2. **Efficient Retrieval:** Experience firsthand the swift and precise retrieval of items with our automated VLM, significantly reducing picking times and increasing order fulfillment speed.
3. **Smart Inventory Management:** Gain insight into the intelligent inventory control features that empower our clients to maintain accurate stock levels and enhance order accuracy.
4. **Enhanced Workplace Safety:** Our VLM system prioritizes safety, minimizing the need for manual handling of heavy items and reducing the risk of workplace injuries.

Marsh Electronics continues to lead the way in warehouse innovation, providing tailored solutions that meet the evolving needs of our customers. The video is now available on our official website and social media platforms.
